Scotland A&E: 4-hour performance

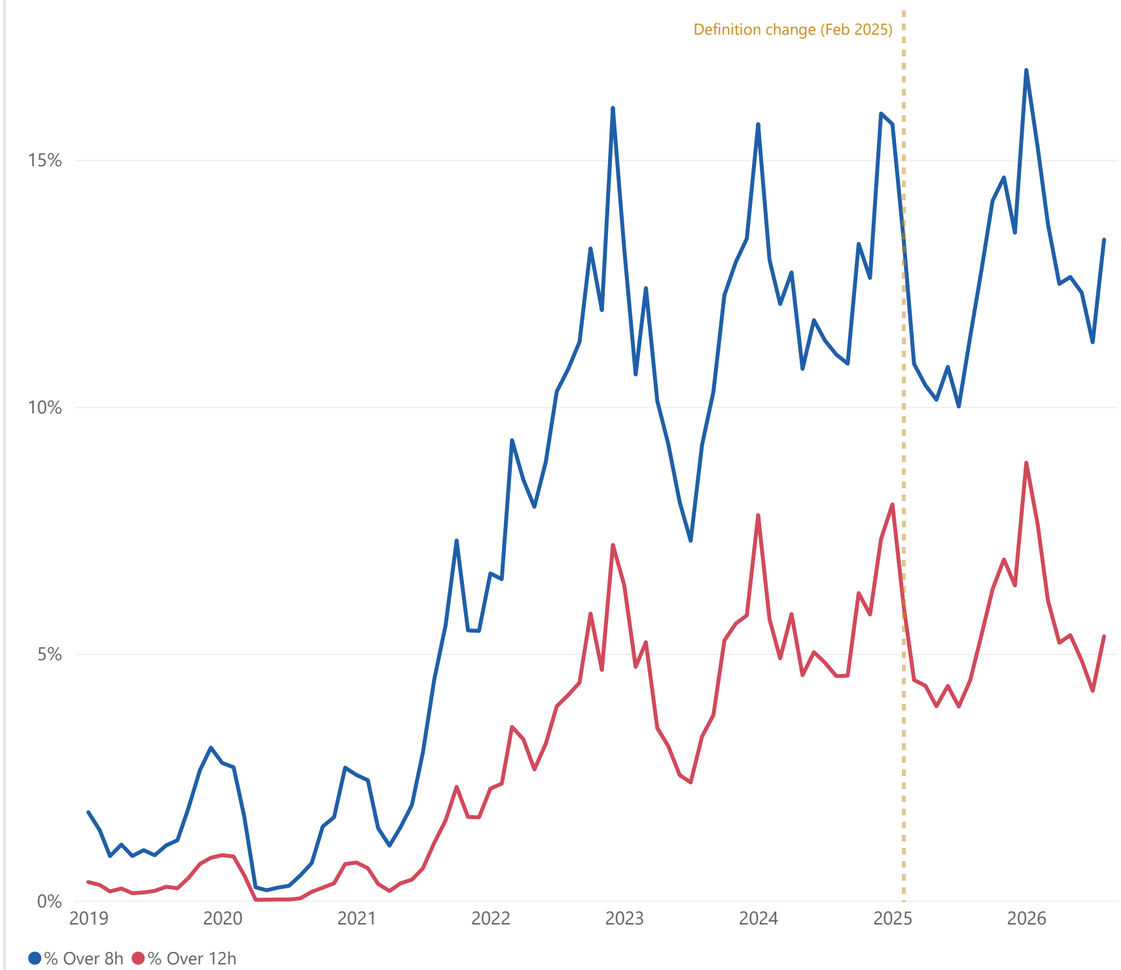

HBName: All

% Within 4h (latest 12m)	% Over 12h (latest 12m)	Attendances (latest 12m)
63.2%	6.0%	1.45M

Share of patients seen within 4 hours has fallen from ~87% to ~63%

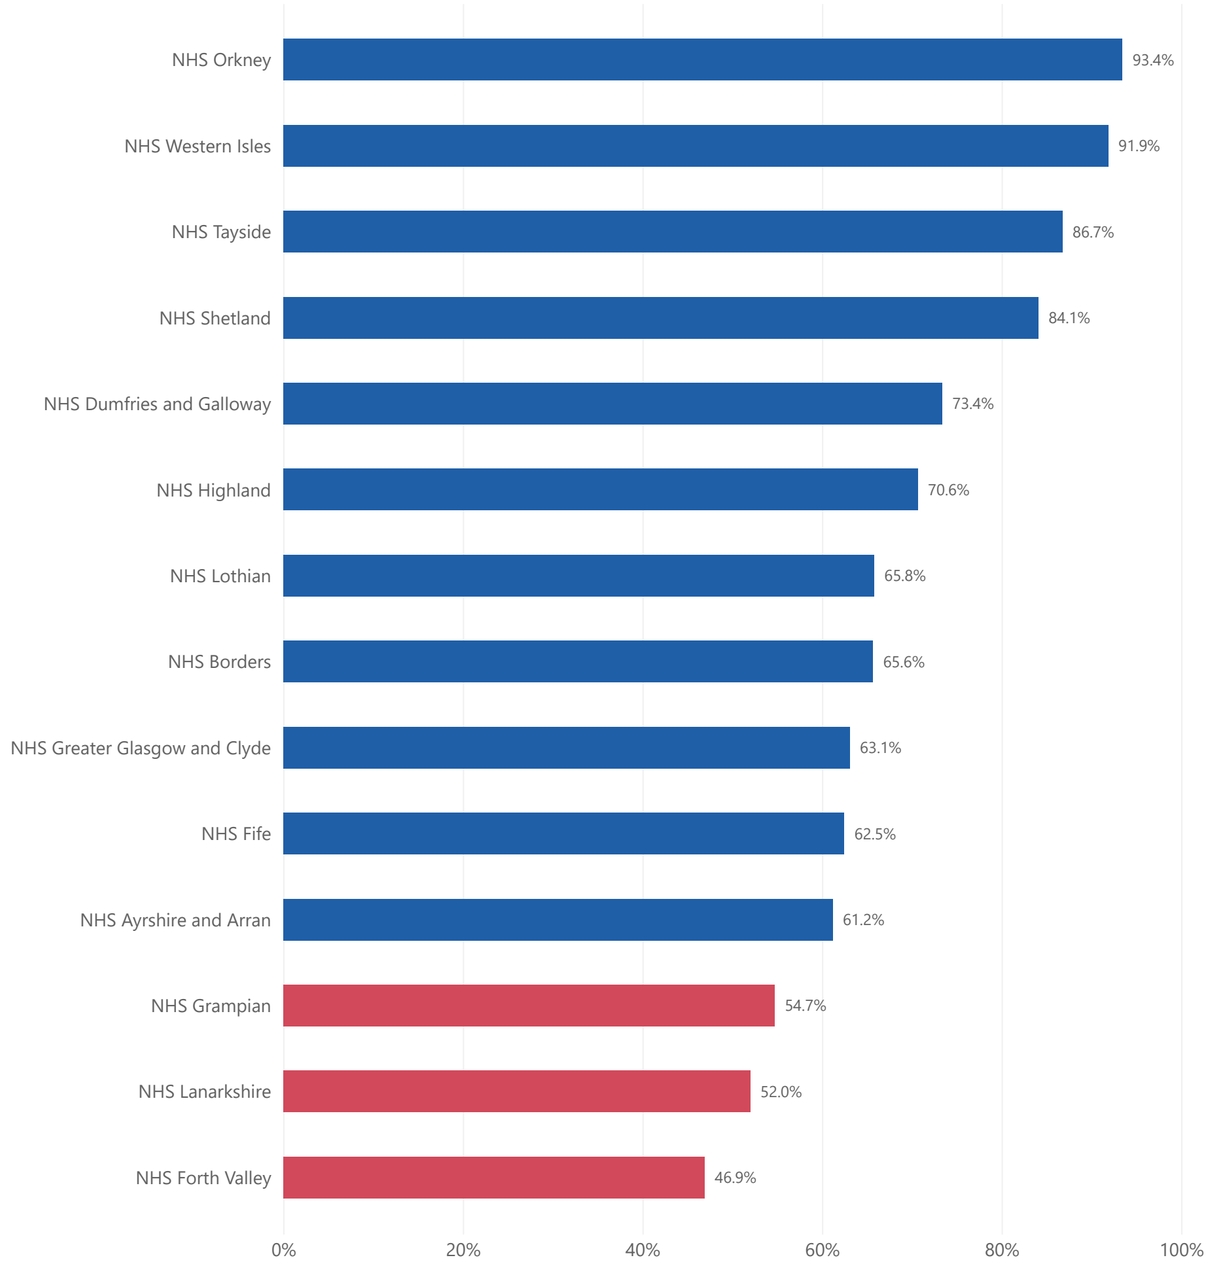

Waits over 8 and 12 hours have grown sharply since 2019

Note: the 2020 peak reflects lockdown-era low attendances, not improved flow. Type 1 Emergency Departments. Source: Public Health Scotland monthly A&E data, to Aug 2026.

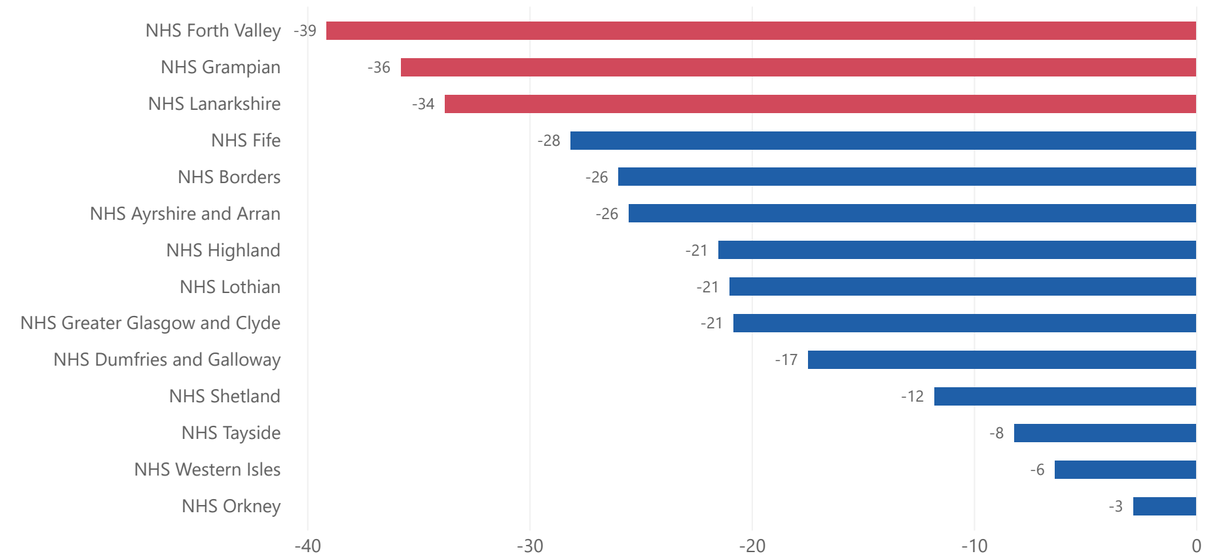

Orkney and Western Isles lead; Forth Valley, Lanarkshire and Grampian trails

10 sites with the longest waits (12+ hours)

HospitalName	HBName	Attendances (latest 12m)	% Over 12h (latest 12m)
University Hospital Wishaw	NHS Lanarkshire	71500	13.9%
University Hospital Ayr	NHS Ayrshire and Arran	35073	12.5%
University Hospital Hairmyres	NHS Lanarkshire	65013	11.6%
Caithness General Hospital	NHS Highland	10533	11.4%
Forth Valley Royal Hospital	NHS Forth Valley	65752	10.7%
Aberdeen Royal Infirmary	NHS Grampian	61225	10.7%
Borders General Hospital	NHS Borders	36265	10.2%
University Hospital Crosshouse	NHS Ayrshire and Arran	65040	10.1%
University Hospital Monklands	NHS Lanarkshire	64971	7.8%
Dr Gray's Hospital	NHS Grampian	29134	6.6%

Forth Valley has fallen 39 points since 2019; Orkney only 3

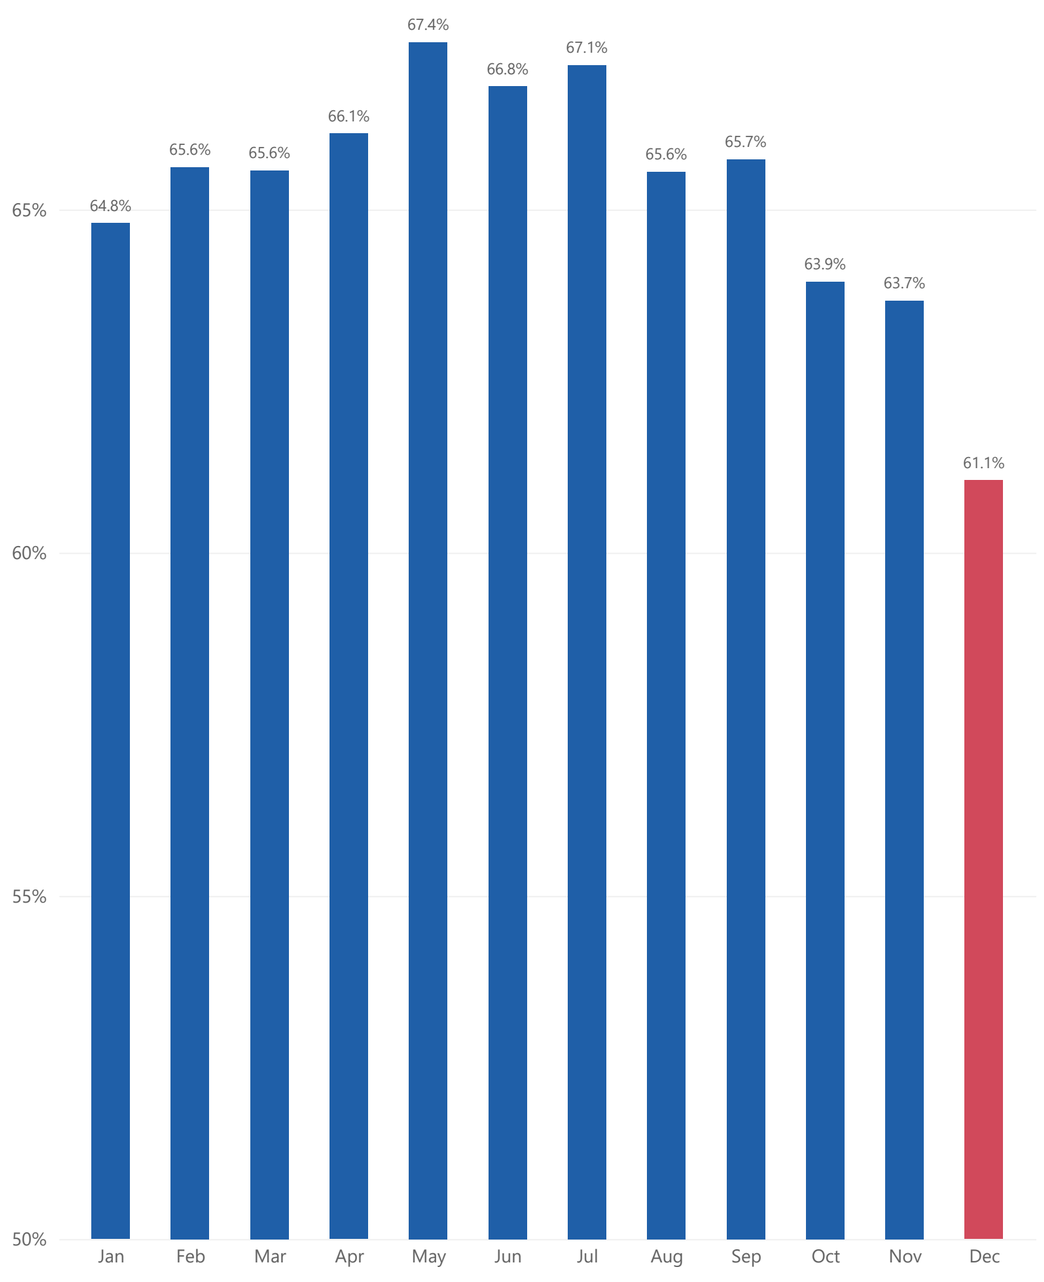

Note: Latest 12 months. Sites under 500 attendances excluded from the site table. Type 1 Emergency Departments. Source: Public Health Scotland monthly A&E data, to Aug 2026.

Similar volumes, very different waits: Ninewells 86% vs Forth Valley Royal 47%

Winter is the weakest period: December is lowest (2022 onwards)

Note: Children's hospitals (blue) are not directly comparable. Seasonality uses Jan 2022 onwards; axis starts at 50%. Type 1 Emergency Departments. Source: Public Health Scotland monthly A&E data, to Aug 2026.
